machines and a couple of ogrants deployed. I have Ganglia installed and some of the ogrants get data from PostGIS. Right now I am performing a daily dump of all the data and pushing it to HBase. Now, the problem is that I don't have any way to "merge" data from all the machines, just data from one. The question is: is it possible to use Ganglia to push the data from all machines, would it be faster and more efficient to use HBase? A: It's certainly possible to use ganglia to push data from all machines but as you'll find, you'll have to care for the performance on
