
OP ROBLOX HACKEXPLOIT INSANE SCRIPT EXECUTOR For MAC OS Win 7-10 MacOSX [TOP]

Jjsplit is a free Roblox exploit that allows you to run scripts, has a nice GUI, httpget autoupdate support, ... This is the first executing script for OSX. There are currently over 40 different types of executables that run on Roblox servers. Jjsplit is available for all supported platforms including Linux, Mac OS, Windows and Solaris and also has its own executable generator for each platform. In this post, we will not go into the details of specific executables. Instead, let's talk about how to use Jjsplit to deploy your scripts to Roblox.
