Once commonly seen as the language of advancement in the countries colonial period, the need to comprehend English has declined, allowing Spanish to dominate the global language market. The changes to English have been rapid and not all are positive; the United States is viewed, at times, as the instigator of linguistic territorialism in Spain. Regional variation in English has become a distinct reality for many, thus the need for further research on the language, as it is felt, is needed to see if there is a future for a language that has lost its sheen to so many. The study draws attention to the ever growing number of Spanish speakers in the United States and Canada, which, in turn, suggest a future marked by the rise of bilingualism in other countries. Finally, the study explores the battle between linguists and the English language in Spain, for not only does this battle pit academics against the language they are studying, it also entails a subtle struggle for a more 'correct' version of English in Spain. The thesis is a pilot study and seeks to examine English as a useful language in education rather than arguing how it should be used. The study starts with a discussion on the relationship between the English language and Spain's colonial period. It is felt that on the surface, Spain possesses a strong interest in and relationship with English, yet, the history of the country's relationship to England is not simple. The following section discusses

the rise of English and the language's popularity in countries across the world. This is followed by a discussion on the US English language in Spanish, as in many aspects it is distinct
